

INTEGRATED BASIC EDUCATION DEPARTMENT

DISCIPLINE SYSTEM

RATIONALE

Discipline is an integral part of the entire teaching experience. Pupils must be taught to make responsible choices and helped to understand that they have some control of the events that happen to them. By fostering critical thinking and promoting shared decision making, teachers and administrators can encourage pupils to be self- responsible and fully functional.

OBJECTIVES

Develop in the pupils the desire to become moral persons by promoting and strengthening Benedictine values.

Inculcate in the minds and hearts of the pupils the love of God as shown by their concern and responsibility toward all members of the community.

Provide learning experiences that increase the child's awareness of and responsiveness to the just demands of society.

Promote and safeguard the welfare and interests of pupils by defining their rights and obligations.

Encourage pupils to exercise their rights responsibly by making them aware; that they are answerable for any infringement of the public welfare.

Establish sound relationships between pupils and the members of the school community.
